

To Whom It May Concern,

I am profoundly disturbed at the news that the NAB is attempting to infringe upon the First Ammendment rights of the satelite radio industry. The new features, such as Instant Traffic and Weather, on XM radio provide a valuable service to XM's PAYING (and VOTING) customers. This petition (04-160) smacks of censorship and should be rejected out of hand! The NAB has no right to tell XM what the can broadcast, nor tell me what I can listen to.

Please do the right thing and reject Petition 04-160.

Thank You,
Brad Perkins
